RECYCLE, SAVE ENERGY, MAKE \$\$\$\$

Kittitas PUD would like to encourage our customers to remove or upgrade their old energy inefficient refrigerators and freezers. Many of these older units use 2-3 times the energy of the new ones. The PUD has contracted with JACO Environmental to schedule and pick up your appliances and issue you a \$30.00 check within 6-8 weeks. All appliances will be taken directly to JACO's recycling plant where the refrigerant is recovered and the basic components are recycled.

HOW DO I SIGN UP ?

Call JACO today at 1-877-577-0510 to schedule someone to pick up your appliance(s). The refrigerators and freezers must be in working condition and must be a minimum of 14 cubic feet in size. Limit two units per residential address.

The Kittitas Refrigeration Recycling Program is only available to the PUD's utility customers through August 2009 or until program funds are expended.

Any questions regarding this program please call the Kittitas PUD at 933-7200 (UPPER COUNTY 509-674-2790)
