

Distributed Generation Interconnection Application Checklist

Follow these steps to apply to become a customer-owned generation producer.

The following required documents are available at KittitasPUD.com or from the office:

- Application for Inter-Connection of Alternative Power Generation
- Power Purchase and Interconnection Agreement

Application steps:

- Submit Application for Inter-Connection of Alternative Power Generation, Power Purchase and Interconnection Agreement, one-line drawing, and New Distributed Generation Interconnection Application Fee to Kittitas PUD.
- A Kittitas PUD engineer will review the application.
 - **Please do not purchase or install equipment until application is approved.**
 - You will be notified when review of application is complete.
- If approved:
 - Obtain electrical permit from Department of Labor & Industries.
 - Install system. All equipment must be appropriately labeled. A copy of the site plan and one-line should be documented. Kittitas PUD will require this information prior to inspection and installation of the Net Meter.
 - Obtain final electrical inspection approval from Department of Labor & Industries.
 - Notify Kittitas PUD of completion of installation and inspection approval and provide an updated one-line drawing if applicable.
- Kittitas PUD will inspect the system and install the Net Meter (bi-directional meter), which will be owned and maintained by the Kittitas PUD.
- Usage will be billed at the applicable rate schedule from the date of installation of the Net Meter.
