

APPENDIX B—COMMUNICATIONS FACILITIES POLE ATTACHMENT PERMIT APPLICATION PROCESS

The following procedure is to be followed by each Applicant seeking to make new Attachments on District Poles. Note that no entity may make any Attachments to District Poles without having first entered into a binding Pole Attachment License Agreement.

1. Applicant shall submit a written request to perform a pre-construction inspection. The request must include a preliminary route description. Applicant shall have a professional engineer, or District approved employee or contractor, participate in a pre-construction inspection, which will include a review of the proposed Attachment(s) to determine the feasibility of the request and identify any potential make-ready work. Appendix E to the Pole Attachment License Agreement contains the minimum design review information that an Applicant must provide and a worksheet for determining the minimum specifications that the proposed Attachment must meet.
2. Following the pre-construction inspection, Applicant shall submit a completed Application for Permit (Appendix C) that includes: route map, information required in Appendix F, installation plans and recommendations on make-ready work. Applicant shall prepare the Application for Permit in adherence with the applicable standards (Section 1.2 of Pole Attachment License Agreement) and specifications (Appendix D).
3. The District will review the recommendations from the inspection and discuss any issues with the Applicant.
4. Upon receipt of written authorization, District will proceed with make-ready work according to the specific agreed-upon installation plans and the terms of the Pole Attachment License Agreement, including payment for the make-ready work charges as set out by District and agreed to by the Applicant.
5. Upon completion of the make-ready work, the District will sign and return the Application for Permit authorizing the Applicant to make its Attachment(s) in accordance with agreed-upon installation plans.
6. The Applicant's professional engineer, District approved employee or contractor shall submit written certification that he/she has completed the post-construction inspection and that the installation was done in accordance with the provisions of the permit. The post-construction inspection shall be submitted within ninety (90) calendar days after installation is complete.

7. If the District waives the professional-engineer requirement, the District will perform the post-construction inspection and charge the Applicant per Articles 3 and 13 of the Agreement.

APPENDIX C—APPLICATION FOR PERMIT
